

The background of the entire page is a dark blue color. It is decorated with a repeating pattern of light blue wavy lines, resembling stylized water or ripples. These lines are arranged in a grid-like fashion, with some lines being slightly offset or missing in certain areas, creating a dynamic and textured effect.

# EUROPEAN AQUATICS®

**Media Kit**

**European Aquatics Championships**

**Paris 2026**

31 July – 16 August 2026

# TABLE OF CONTENTS

## PART 1 (Final entry deadlines: July 21<sup>st</sup>)

### I – GENERAL INFORMATION

- Former host cities of all LEN/EA European Championships
- Facts & Figures

### II – ARTISTIC SWIMMING

- Preview + Participating nations + Schedule
- Understanding Artistic Swimming
- Medal Tables: All-time + Funchal 2025 + Belgrade 2024 + Oswiecim 2023 + Rome 2022 + Budapest 2021 + Glasgow 2018 + London 2016 + Berlin 2014 + Eindhoven 2012 + Budapest 2010
- Champions-Favourites by Day
- Medallists: Olympic Games, World and European Championships

### II – DIVING

- Preview + Participating nations + Schedule
- Understanding Diving
- Medal Tables: All-time + Antalya 2025 + Belgrade 2024 + Rzeszow 2023 + Rome 2022 + Budapest 2021 + Kyiv 2019 + Edinburgh 2018 + Kyiv 2017 + London 2016 + Rostock 2015 + Berlin 2014
- Champions-Favourites by Day
- Medallists: Olympic Games, World and European Championships

### III – OPEN WATER SWIMMING

- Preview + Participating nations + Schedule
- Understanding Open Water Swimming
- Medal Tables: All-time + Stari Grad 2025 + Belgrade 2024 + Rome 2022 + Budapest 2021 + Glasgow/Loch Lomond 2018 + Hoorn 2016 + Berlin 2014 + Piombino 2012 + Eilat 2011
- Champions-Favourites by Day
- Medallists: Olympic Games, World and European Championships

## PART 2 (to be added later, once the entries are closed)

### IV – HIGH DIVING (Final entry deadline: July 28<sup>th</sup>)

- Preview + Participating nations + Schedule
- Understanding High Diving
- Medal Tables: All-time + Rome 2022
- Champions-Favourites by Day
- Medallists: Olympic Games, World and European Championships

### V – SWIMMING (Final entry deadline: July 31<sup>st</sup>)

- Preview + Schedule + Participating nations
- Understanding Swimming
- Medal Tables: All-time + Belgrade 2024 + Rome 2022 + Budapest 2021 + Glasgow 2018 + London 2016 + Berlin 2014 + Debrecen 2012 + Budapest 2010
- Records
- Records-Champions-Favourites by Day
- Medallists: Olympic Games, World and European Championships

## LEN / EA EUROPEAN CHAMPIONSHIPS – ALL HOST CITIES SINCE 1926

## FACTS & FIGURES

... **DATE:** From July 31 to August 16, 2026, the French capital Paris will stage the 38<sup>th</sup> edition of the European Aquatics Championships in swimming (10-16 August), open water swimming (04-08 August) and high diving (07-09 August), as well as artistic swimming (31 July-05 August) and diving (31 July-06 August) in the first competition week. High diving – introduced to the European schedule in Rome 2022 – is part for the second time.

... **EUROPEAN AQUATICS (EA / LEN):** The “Ligue Européenne de Natation” – since 2023 European Aquatics – was founded on August 30, 1927 in Bologna/ITA by 11 countries and their national swimming federations, one year after the first European Championships in Swimming, Diving and Water Polo had been held in Budapest. Today European Aquatics has 52 member federations from Albania to Ukraine.

... **HISTORY of EUROPEAN CHAMPIONSHIPS:** Staged for the first time in 1926, the championships have been constantly evolving in the past 100 years. While the inaugural edition in Budapest featured men-only events – six in swimming, two in diving and the water polo tournament –, the upcoming edition in Paris will see 76 medal events and competitions will be staged in five disciplines: swimming (43 events), diving (13), high diving (2), artistic swimming (11) and open water swimming (7).

During its century-long history, the championships’ programme has been expanded. Female athletes were welcomed right from the second edition in 1927, in swimming and in diving. Synchronised swimming, after a trial-like stand-alone event in Amsterdam 1974, became a ‘full-time’ feature at the ‘big’ championships from Jonkoping 1977. Eight years later Oslo hosted the first women’s water polo championships, then from 1987 the ladies’ teams could also share the grand stage at the major event. Open water had three stand-alone meets before the discipline debuted at the championships in Vienna 1995, though from time to time it was separated from the LEN family gathering, when the championships were held in the spring in Olympic years in cities where the weather did not favour the warriors of the wild waters. However, summer editions always include the aquatic marathonists.

With the championships growing bigger and bigger, LEN/EA decided to stage the European Water Polo Championships as a stand-alone event – which proved to be the right step: since the continents’ teams are the rulers of this sport, the WP championships have been outstanding success since 1999, while the European Aquatics Championships remained a sustainable event from the organisers’ point as well as a highlight of the international sport calendar.

... In recent years, alongside with World Aquatics, European Aquatics has also launched more and more mixed events in all disciplines: mixed relays have become a big boost for the programme (the mixed 4x200m free is only contested at the Europeans), just as the mixed synchro events in diving, the mixed duet in artistic swimming and the mixed relay in open water. And to honour gender equality, the 2022 Rome edition featured the first-ever men solo event in artistic swimming.

The record holder still is Hungary, where EA’s top showcase was staged 6 times (1926, 1958, 2006, 2010, 2021 in Budapest, 2012 in Debrecen – water polo Europeans were also held in Budapest in 2001, 2014 and 2020). In this ranking, Vienna sits in the second place with three championships (1950, 1974, 1995), while Rome (1983, 2022) joined London (1938, 2016) and Berlin (2002, 2014) as two-time organiser (though Italy staged more editions: Bologna 1927 and Turin 1954). Now Paris enters to this club hosting the Europeans for the second time after 1931.

... **HOSTS:** The French Swimming Federation (Fédération Française de Natation, FFN) – founded in February 1919 – is the governing body of swimming in France and chaired by Gilles Sezionale since April 2017.

The European top showcase visits Paris for the 2<sup>nd</sup> time. In 1931, the French capital was host to the European Championships, back then featuring swimming, diving and water polo in its programme. Paris also hosted the 1900, 1924 and 2024 Olympic Games.

In addition to the events in Paris, France also hosted the 1987 Europeans, held in Strasbourg (swimming, diving, synchronized swimming as well as men's and women's water polo). The city of Chartres - located 90 kilometers southwest of Paris – hosted the 2012 European Short Course Swimming Championships.

... **PARTICIPANTS:** According to the final entries, as of today, **22 EA Member Federations** will compete in **Artistic Swimming**. **29 EA Member Federations** will be represented in **Diving** and **23 EA Member Federations** at the **Open Water Swimming** events. The numbers of Federations and athletes participating in the **High Diving** and **Swimming** competitions will be announced after the respective deadlines.

... **TITLES:** A total of **76 titles** will be awarded: **43 in Swimming** (Berlin 2014 saw the “official première” of the two mixed relay events 4x100m free and 4x100m medley; Glasgow 2018 saw the “official première” of the mixed relay event 4x200m free), **13 in Diving**, **11 in Artistic Swimming**, **7 in Open Water Swimming** and **2 in High Diving**.

- For the tenth time in Diving, medals will be awarded in the **Mixed 3m Synchro** and **Mixed 10m Synchro** events.
- In Artistic Swimming, the **Mixed Duet** will be on the programme for the eighth time.
- For the fourth time after 2022, medals will be awarded in the Artistic swimming men's solo events.
- For the second time after 2022, medals will be awarded in the High Diving events.

... **COMPETITION MODUS:** In **Swimming**, ten lanes will be used for the heats. All semi-finals (50m, 100m and 200m) and finals will be carried out in eight lanes. In individual events, a maximum of four entries per Federation and per event may be submitted. Notwithstanding times and places achieved in the heats, only the two fastest swimmers of each Federation may proceed to the semi-finals or finals. The qualifiers for the final shall be 1<sup>st</sup> and 2<sup>nd</sup> in each semi-final together with the fastest times from the remaining swimmers in the semi-finals.

In individual **Diving** events two entries per Federation and per event may be submitted. For the Synchronised Events and the Team Event, only one team per Federation and per event may be entered.

In **Artistic Swimming** one entry per Federation and per event may be submitted. In **Open Water Swimming** three entries per Federation and per event may be submitted.

... **MEDALS:** In the history of the championships – from 1926 in Budapest until today – a total number of **5.070 medals** in gold, silver and bronze have been awarded in swimming (long course 3.220), diving (1065), synchronised/artistic swimming (408, since Amsterdam 1974), open water swimming (371, since Stari Grad 1989) and high diving (6).

168 medals - including 6 medals in the men's water polo events of Belgrade, as well as the women's tournament in Funchal in 2026 - were awarded in water polo for men (since 1926) and women (since 1985).

... **PRIZE MONEY:** Almost half million Euros will be awarded to the athletes and teams ranked from first (1st) to third (3rd) place across all disciplines.

## PREVIEW – DIVING

### Halfway on the road to Los Angeles 2028: 29 Federations eyeing 39 medals at European Aquatics Diving Championships in Paris

- **Great Britain, Ukraine, Germany, Italy and Host France with strong teams**
- **“Old hands” and “young guns” fighting for the titles**

Paris (EA) – Divers from 29 federations - three more than in Belgrade 2024 (26) and six more than in Antalya 2025 and Rome 2022 (23) - will be competing for the podium's top spots at the upcoming European Aquatics Diving Championships in Paris. A total of 39 medals in 13 diving events will be awarded: 1m, 3m springboard, 10m platform, 3m and 10m synchro, each for men and women, as well as the team event and the mixed synchronised events on the 3m springboard and the 10m platform.

Two years after the Olympic Games, the French capital will again welcome numerous diving powerhouses: Apart from host France, Great Britain, Germany, Italy and the Ukraine will be fighting the medals. However, following the partial return of Belarus and Russia—competing under the designations NAA (Neutral Athletes A – Belarus) and NAB (Neutral Athletes B – Russia)— the final medal table will in all probability will look different compared to those in the past five years.

The **29 federations** have entered a total of **139 athletes – 62 females and 77 males**. Among them are some highly decorated divers as well as numerous young promising talents. The competitions held right in the middle of the Olympic cycle will give athletes the opportunity to assess—and potentially re-evaluate—the path they have chosen leading up to the 2028 Olympic Games in Los Angeles.

Diving (3m springboard and 10m platform) has been on the programme of European Aquatic Championships since its first edition in 1926 in Budapest (in the men's category; the women entered one year later in Bologna). The synchronised events were introduced to the European Championships for the first time in 1997. The team event – an official European Championship event since 2012 – will be held for the 14<sup>th</sup> time. The mixed synchronised events celebrated their première at the 2016 Europeans in London.

Keeping in mind that after the 2021 Europeans in Budapest and the 2022 edition in Rome the diving elite also met in Rzeszow, Poland, where the complete diving programme with 13 events had been a part of the 2023 European Games, and the last edition in Belgrade 2024 and Antalya 2025, the event in Paris will be the sixth European Championships in as many years.

After four outdoor editions 2010 (Budapest), 2022 (Rome), 2024 (Belgrade) and 2025 (Antalya) the competitions in Paris are going to be held indoors. Since the 2013 FINA World Championships in Barcelona (five out of the first seven Worlds were held outdoors in the new millennium: 2003, 2005, 2009, 2011, 2013), most major diving competitions moved indoors: Olympics, Worlds, Europeans. Only the 2016 Olympics in Rio were carried out outdoors.

#### **Great Britain, NAB, Ukraine, Italy and Germany entered all 13 events and arrive with biggest teams**

Ten of the 13 European champions from Antalya entered the respective events and will be trying to defend their titles in the same lineup as in 2025. Five European “diving powerhouses” – Germany, Great Britain, Italy, Ukraine and NAB - have entered all 13 events. Great Britain is travelling to Paris with 15 athletes—the largest squad—ahead of the teams from the NAB (13), Ukraine and Italy (12 each) as well as Germany (10).

**Ukraine** topped the medal table at last year's edition in Antalya with five gold medals, Oleksii Sereda played a major part in three of these golds. The former “Wunderkind” is no kid any longer but a 20-year-old twen. Sereda won his first of altogether four European platform titles in Kyiv in 2019 in front of a home crowd at age 13 and became the youngest European champion ever – this is why he certainly aims to defend his

## PREVIEW – DIVING

2025 titles (10m platform, synchro 10m platform together with Mark Hrytsenko and team event). Apart from Sereda the Ukraine can count on further medal contenders such as Kseniia Bailo, Kirill Boliukh, Danylo Konovalov, Stanislav Oliferchuk and the new synchro duo Ksenia Bochek and Diana Karnafel, who won European gold in the synchronized springboard event at their first ever "major" European Championship in Antalya.

**Great Britain** topped both medal tables – in Rome 2022 (6-3-3 / 12) as well in Belgrade 2024 (4 gold, 3 bronze – altogether 7). Their strengths lie primarily in the synchronized competitions. Yasmin Harper and Scarlett Mew Jensen won bronze at the 2024 Paris Games and silver at the 2025 World Championships in the 3m synchronized springboard event. Their teammates Andrea Spendolini-Sirieix and Lois Toulson won Olympic bronze in the 10m synchronized platform event. On the men's side, Anthony Harding and Jack Laugher won Olympic bronze in the 3m synchronized springboard event, as well as bronze at the 2025 World Championships.

While Elena Bertocchi (5 gold, 3 silver, and 2 bronze medals at European Championships) currently concentrates on her family and baby, Chiara Pellacani stepped up as the "leading woman" of Team **Italy**. In her hometown Rome, the meanwhile 23-year-old won five medals in 2022. She has since amassed a total of 19 European Championship medals, including eight golds. In Antalya 2025, she claimed her first gold in the 1-meter springboard competition; shortly thereafter, at the Singapore Worlds, she added two bronzes (1m, 3m) as well as her first gold in the mixed synchro event with Matteo Santoro. "Old hands" such as Giovanni Tocci (0-5-3/8) and Lorenzo Marsaglia (1-6-2/9) are just as much medal contenders as "young guns" such as Sarah Jodoin di Maria (2-3-4/9), Matteo Santoro (2-3-2/7) or European Championship debutant Romano Wang.

**Germany** has successfully compensated the retirements of their multiple medallists Patrick Hausding, who is still the most successful diver in the history of European Championships with 15 European titles to his name, and Tina Punzel. In Paris, 1m European champion Moritz Wesemann will head the team together with his experienced compatriots Lena Hentschel, Jette Mueller and last year's World and European 10m platform silver medallist Pauline Pfeif. Youngsters such as Ole Roesler and Luis Avila complete the 10-athletes strong team. 30-year-old Timo Barthel, 2023 European 10m champion, didn't qualify for the Paris edition after several injuries and surgeries.

At age 36, Evgenii Kuznetsov is the oldest diver in the field in Paris. Kuznetsov leads Team **Neutral Athletes B - NAB**, which includes other highly successful divers such as Nikita Shleikher, Ruslan Ternovoi, Ilia Molchanov and Ekaterina Beliaeva. Kuznetsov won his first European Championship medal in Budapest 2010; the 1m and 3m springboard specialist claimed a total of seven Europeans gold medals between 2010 and 2021. At the 2012 Olympic Games, he won silver in the 3m synchro event alongside his partner Ilya Zakharov.

Host **France** landed place three in the medal table in Belgrade 2024 with two gold (Gwendal Bisch/3m, Jules Bouyer/Alexis Jandard/3m Synchro), one silver (Emily Hallifax/10m) and two bronzes (Jade Gillet/Hallifax/10m synchro, Nais Gillet/Juliette Landi/3m synchro). After the French missed the Antalya edition last year, it will be interesting to see how they perform in front of their home crowd. The eight divers will compete in eight of the 13 events.

### **Switzerland back with Michelle Heimberg – Poland bets on "andy-since1991"**

Michelle Heimberg is the figurehead of Team **Switzerland**. She earned the first-ever Swiss diving medal in history in 2017, a silver in the women's 3m event. In Antalya she added 3m springboard gold and 1m springboard bronze, bringing her total of European medals to two gold, three silver and three bronze. At the competitions in Paris, fans can be surely looking forward to another battle against Italian Chiara Pellacani.

## PREVIEW – DIVING

Heimberg's counterpart on Team **Poland** is Andrzej Rzeszutek, who is experiencing a real career-high in the "autumn" of his career. Born in 1991 and—at age 34—the second-oldest competitor in Paris, Rzeszutek crowned his career with gold on the 3m springboard in 2025. It remains to be seen whether the Pole can build on this performance in Paris.

### **Spain, Sweden, Austria and Armenia hope for further medals**

**Austria, Sweden** and **Armenia** caused surprises in the past years and may also play an important role when the medals in Paris will be awarded. Austria's Anton Knoll and Dariush Lotfi will be trying to repeat their victory in the 10m synchro event in 2024. Aleksandra Bibikina won the second medal ever for Armenia in 2025 with silver in the 3m springboard. And Elna Widerstrom continued a long tradition for Sweden following in the footsteps of Sweden's diving icons, the 1972 Olympic champion Ulrika Knape and her daughter Anna Lindberg (3-time European champion 1m 2008/2012 and 3m 2011). After 1m gold in Belgrade Widerstrom claimed silver in Antalya 2025.

**Spain** created a positive surprise, ending on second place in Belgrade 2024 and thus making a big step in the all-time medal table with 3 gold and 3 silver. In Antalya 2025 Valeria Antolino and Ana Carvajal added another gold. In Paris, Spain will be pinning their greatest hopes again on the synchro platform duo. However, the two Spaniards will face very tough competition in Paris.

### **Prize money for all medallists**

In 2009, the first-ever stand-alone European Diving Championships (former European Diving Cup) took place in Turin, Italy. Since then, the divers have had the opportunity to compete in a continental event each year. In even years, diving is part of the European Aquatic Championships (due to the postponement of the 2020 edition the stand-alone diving Europeans weren't held that year). Since Rostock 2015, LEN offers prize money for all medal winners at the diving championships and, additionally, travel assistance for all participating nations.

Here is the breakdown of the prize money for the respective events:

- **Individual events** -> 1<sup>st</sup> place: 2,000 € - 2<sup>nd</sup> place: 1,500 € - 3<sup>rd</sup> place: 1,000 €
- **Synchro/Team events** -> 1<sup>st</sup> place: 2,500 € - 2<sup>nd</sup> place: 2,000 € - 3<sup>rd</sup> place: 1,500 €

**The following 29 EA member federations have entered for Paris:** ARM – Armenia, AUT – Austria, BUL – Bulgaria, CRO – Croatia, CZE – Czechia, DEN – Denmark, ESP – Spain, FIN – Finland, FRA – France, GBR – Great Britain, GEO – Georgia, GER – Germany, GRE – Greece, HUN – Hungary, IRL – Ireland, ITA – Italy, LTU – Lithuania, NAA – Neutral Athletes A, NAB – Neutral Athletes B, NED – Netherlands, NOR – Norway, POL – Poland, POR – Portugal, ROU – Romania, SRB – Serbia, SUI – Switzerland, SWE – Sweden, TUR – Türkiye, UKR – Ukraine

## **EDUCATIONS FACTS: UNDERSTANDING DIVING**

Diving combines athleticism, acrobatics, precision, artistry and bravery. Athletes perform complex aerial movements from springboards and platforms with maximum control, finishing by entering the water, while aiming at a position as close as possible to 90° verticality with minimal splash.

At the European Aquatics Championships, Diving events feature individual, synchronized and mixed competitions across multiple heights and disciplines.

Success in Diving depends on:

- Technical precision
- Difficulty
- Body control
- Spatial awareness
- Powerful and proper biomechanics, dive technique, and amplitude
- The diver's aesthetics, creating an overall impression
- Mental focus and resilience under pressure

## **THE DISCIPLINES**

### **Springboard Diving**

Springboard events are contested from:

- 1 metre
- 3 metre

The flexible board provides athletes with spring, lift, and height, allowing them to perform multiple somersaults and twists.

The fulcrum on the board's stand adjusts the depth of the board's movement under the diver's pressure, increasing the rebound force and helping propel the diver higher.

#### **What makes it unique?**

- It is a partnership between the athlete and the board.
- Timing and rhythm on the board are crucial to utilize its resonating force.
- Athletes generate height through controlled bouncing movements.
- A precise, balanced, and powerful take-off trajectory directly impacts the dive.
- A dive from the 3-metre springboard can reach a height of up to 7.5 metres.

### **Platform Diving**

Platform events are contested from:

- 10 metre platform in seniors

Unlike the springboard, the platform is completely rigid.

Its concrete base is covered with an anti-slip surface and all the take-off power is created by the explosive force of the diver alone.

## EDUCATIONS FACTS: UNDERSTANDING DIVING

### What makes it unique?

- Athletes rely entirely on explosive power
- Greater height allows more complex dives and spectacular entries
- Armstand dives are performed from a handstand position at the edge of the platform, facing either forward or backward
- The impact force experienced by a diver entering the water from 10 metres is significantly greater than from 3 metres due to the increased potential energy.
- $m = \text{body mass kg} \times \text{accelerate downward at approximately } 9.8 \text{ m/s}^2 \times \text{height/}$   
aproximate stopping way under water

---

$$F = \frac{m \cdot g \cdot h}{d}$$

Example: girl diver of 50kg x 9,8 m/s<sup>2</sup> x 10m = 1225 N  
4m

Platform diving is often considered one of the most spectacular disciplines in aquatics.

---

## SYNCHRONIZED DIVING

### What is Synchronized Diving?

It is the coordinated performance of two athletes executing the same dive simultaneously.

The magic of synchronized diving is that athletes, even twins or siblings, are not necessarily identical in biometrics, weight, physical capabilities, or other characteristics, but train as a single unit to replicate each movement with near-perfect timing and precision.

Introduced in international competitions in 1997.

Judges' panel includes two types of judges evaluate:

- Individual judges (2+2 or 3+3 each poolside) – execution
- Synchronized judges (2+3 each poolside) coordinated performance of divers in:
- similarity of the starting position, approach, take-off and height;
- coordinated timing of the movements during the flight;
- similarity of the verticality of angles of the entries;
- comparative distance from the springboard or platform of the entry;
- coordinated timing of the entries.

### What to watch for

- Simultaneous movements from the starting position through take-off.
- Matching body movements in the air.
- Perfect synchronization in timing, distance, vertical alignment, and clean entries.

Even tiny differences between divers can affect the final score.

---

## **EDUCATIONS FACTS: UNDERSTANDING DIVING**

### **MIXED EVENTS**

#### **Mixed Synchronized Diving**

Mixed events feature male and female athletes competing together as a team.

These events combine:

- Synchronization
- Team chemistry
- Strategic dive selection
- 

---

### **DIVE STRUCTURE & VOCABULARY**

#### **The Six Dive Groups**

1. Dives are categorized into groups describing the direction and sort of rotation:
2. Forward
3. Backward
4. Reverse
5. Inward
6. Twisting
7. Armstand (platform only)

---

#### **Somersaults & Twists**

Dives are identified by:

- Number of somersaults (each half somersault counts as one unit in the dive code).
- Number of twists (one full twist equals 360°, and each 180° counts as one unit in the dive code).
- Starting position and direction of rotation.
- Body position.

The more difficult the dive, the greater the scoring potential if executed successfully.

---

#### **Body Positions**

##### **Tuck**

Ball-like body position with bent knees pulled tightly toward the chest.

##### **Pike**

Legs straight with the body bent at the hips.

##### **Straight**

Body completely straight throughout the dive or at least during half a somersault.

Straight-position dives require more power and skill from the divers.

---

## EDUCATIONS FACTS: UNDERSTANDING DIVING

### Degree of Difficulty (DD)

Every dive has a Degree of Difficulty, with its value based on:

- Complexity
- Number and combination of different rotations
- Number of twists
- Fly position
- Height
- Springboard or platform origin

Higher DD increases scoring potential but also increases the risk of dive failure.

### Final scores combine:

- Execution scores ( $\Sigma$  of 3 of 7 after two highest and two lowest scratched: in synchro it is same approach but 2 of 6 execution and 3 of 5 synchro remaining)

X multiplied to the

- Degree of Difficulty (DD) of the dive

Higher DD increases scoring potential but also the risk of dive failure

---

## HOW DIVING IS JUDGED

### What Judges Evaluate

Judges score:

- Starting position and approach (hurdle or rocking the board in back standing dives)
- Take-off power
- Parabola, distance and sketch of the dive
- Amplitude
- Flight
- Body position
- Execution of all the elements
- Entry into the water

---

### The Entry

One of the most important elements of a dive is the entry into the water.

The ideal entry:

- Is completely vertical (close to 90° relative to the water surface)
- Produces little or no splash
- Demonstrates full control

Spectators will often hear commentators refer to a "rip entry" — a near-perfect splash-less entry that tears through the water with a sound resembling tearing paper.

Divers use a "flat-hand grab" and rigid body alignment to create a cavity in the water and reduce splash.

## COMPETITION FORMAT

### Preliminary Round

Athletes, depending on the gender and the apparatus perform in Individual Events respectively set number of dives from number of groups indicated without a limit of the degree of difficulty.

|       |                       |                                                                |
|-------|-----------------------|----------------------------------------------------------------|
| Women | 1m, 3m<br>Springboard | 5 different dives<br>from 5 groups<br>(no armstand dives)      |
|       | 10m<br>Platform       | 5 different dives<br>from 6 groups<br>including armstand dives |
| Men   | 1m, 3m<br>Springboard | 6 different dives<br>from 5 groups<br>(no armstand dives)      |
|       | 10m<br>Platform       | 6 different dives<br>from 6 groups<br>including armstand dives |

12 Top-ranked athletes advance to the Final. In case of tie, all tied divers proceed to the Final.

### Finals

Finalists compete in the reverse order of the preliminary standings and begin with zero (0) points. In all synchronized events, including Mixed Synchronized Diving and the Mixed Team Event, competitions are held as direct finals.

### KEY MOMENTS TO WATCH

#### The Hurdle in running dives and acceleration in standing from the start position into the Take-off

The approach and take-off determine the direction of the dive, parabola, height, starting rotation speed and control of the dive.

### Mid-Air Rotation

Athletes must complete multiple rotations and/or twists while maintaining body alignment and awareness of the movement control.

### Synchronization

In synchronized events, audiences should focus on:

- Seeing in profile actually one body of two athletes matching both performance in timing, distance and movement as sole dive sketch
- Simultaneous rotations
- Identical lines and entries

### The Entry

The cleanest entries often separate medal positions in close competitions, which is not always absolutely correct, thus undergoing the human factor being affected by spectacular finishes and getting one of the dive's element overvalued.

But "rip" vertical entries always matter

## EDUCATIONS FACTS: UNDERSTANDING DIVING

### WHAT MAKES DIVING EXCITING TO WATCH

#### High-Risk, High-Reward, Unpredictiveness and Aesthetics

Athletes attempt increasingly difficult dives to maximize scoring potential.

A perfectly executed high-difficulty dive can dramatically change the standings.

High excitement leading to small misconducting may cause fatal miscontrol culminate into the dive failure .... rare but once in a life even champions produce failed dives.

The bigger event the harder is the contending and hence psychological pressure.

---

#### Precision Under Pressure

Events are often decided by extremely small margins.

One minor mistake can:

- Reduce execution scores
  - Destabilize a diver's confidence and competitive rhythm.
  - Affect synchronization
  - Change medal outcomes
- 

#### Spectacular Acrobatics

Modern diving includes:

- Multiple somersaults
- Twists
- Armstand dives in different directions from the Platform
- Complex combinations
- Effective entries

All completed in less than two seconds

---

### COMMON MISCONCEPTIONS

#### “The smallest splash always wins”

While splash size matters, judges primarily evaluate:

- Technique
- Body position and lines
- Movement executed and its overall impression
- Comparative to the previous or similar dive
- Control
- Vertical alignment

A small splash alone does not guarantee a high score.

---

#### “Higher difficulty guarantees victory”

Higher DD increases scoring potential, but poorly executed dives receive lower execution scores. In practice, a higher DD dive only becomes advantageous when executed above a certain quality threshold.

Athletes must balance:

- Difficulty
  - Consistency
  - Boldness
  - Precision
  - Execution quality
-

## EDUCATIONS FACTS: UNDERSTANDING DIVING

### SAFETY IN DIVING

#### Athlete Safety

Diving requires strict safety procedures due to:

- Height
- Speed
- Rotational complexity
- Interaction with the apparatus

Competition venues include:

- Medical teams
  - Safety personnel
  - Warm-up supervision
  - Equipment inspections
- 

### TECHNICAL TERMS & VOCABULARY

#### Tuck Position

Bent knees pulled toward the chest creating body-ball-like grouping shape;

#### Pike Position

Straight legs with the body bent in half at the hips.

#### Free position

A combined aerial position where parts of the dive may be performed in straight, pike, tuck, or bent-knee positions, particularly in twisting dives with fewer than two somersaults.

#### DD (Degree of Difficulty)

Numerical value assigned to the complexity of a dive.

#### Auerbach =

reverse a forward approach, backward rotating dive named after Berlin swimming and gymnastics teacher Wilhelm Auerbach, exhibited first in 1890-1900 years

#### Hurdle

Continuous forward to the edge board approach with hops, or springs step taking off from one foot and landing on two feet in running dives

#### Flat Feet

A technical error in which the diver fails to keep the toes pointed and together throughout the movement.

#### Split Tuck

when bent knees are too far apart in the aerial position exceeding shoulders line which is technically and aesthetically not pleasing is deducted between ½ and 2 points by each judge

#### "Kick Out"

come out of a spin or flip preparing to the entry

#### Spot

The specific point on the ceiling, wall, or water that the diver locks their eyes onto to know when to "kick out" of a dive.

#### Rip Entry

a near-splashless water entry

## EDUCATIONS FACTS: UNDERSTANDING DIVING

### Synchronization

How closely two divers mirror each other coordinating their movements in synchronized events.

---

### WHAT THE PUBLIC SHOULD KNOW

#### Silence During Dives

As in many precision sports, athletes benefit from quiet conditions immediately before the dive. Spectators are encouraged to:

- Applaud after dives.
  - Support athletes throughout the competition.
  - Remain quiet after the referee's whistle signals the diver to perform the dive.
- 

### INTERESTING FACTS

#### Did You Know?

- Platform divers enter the water at speeds of approximately 50 km/h.
- Some dives involve more than four somersaults or up to 1620° of multiple twists.
- Synchronized divers can see and monitor each other through lateral and peripheral vision during parts of the dive, particularly during the approach, take-off, kick-out, and entry.
- Elite divers train for many years and complete thousands of repetitions to perfect entries and aerial awareness.
- Olympic and European medal positions are frequently separated by fewer than 10 points.

## ALL-TIME European Medal Table Diving

(all events 1926-2025)

|    | Nation          | Gold | Silver | Bronze | Total |
|----|-----------------|------|--------|--------|-------|
| 1  | URS / RUS       | 102  | 94     | 72     | 268   |

The background of the entire page is a dark blue color. It is decorated with a repeating pattern of light blue wavy lines, resembling stylized water or ripples. These lines are arranged in a grid-like fashion, with some lines being slightly offset or missing in certain areas, creating a dynamic and textured effect.

## **PREVIEW – ARTISTIC SWIMMING**

### **Multiple medal winners at Olympics, Worlds and Europeans in the medal hunt – 22 Federations to participate at the European Artistic Swimming Championships in Paris**

Paris(EA) After visiting the "Flower Island" Madeira in the North Atlantic last year, the elite of artistic swimming is now heading to the City of Love, Paris. The European Aquatics Championships in the French capital kick off with the Artistic Swimming events between July 31 and August 5. A total of 33 medals will be awarded in eleven events.

There is no question that the top favourites in this discipline come from Spain and Italy. However, following the partial return of Belarus and Russia—competing under the designations NAA (Neutral Athletes A – Belarus) and NAB (Neutral Athletes A – Russia)—it can highly be expected that the final medal table will look different compared to those of the last five years. Most recently, at the European Junior Championships in Munich, athletes from NAB clearly dominated the top ranks.

A glimpse at the all-time ranking shows that Russia (57 gold – 6 silver – 1 bronze, altogether 64 medals) continues to clearly dominate, despite its long absence. In the meantime, a trio comprising Spain (19-28-15 / 62), Ukraine (15-23-11 / 49), and Great Britain (14-6-11 / 31) has closed the gap a little bit and is within striking distance in the battle for second place. It remains exciting to see what the medal table will look like once the eleven competitions in Paris have concluded.

The artistic events have always been mostly part of the “big” European Aquatics Championships, such as in Berlin (2014), London (2016), Glasgow (2018), Budapest (2020, due to the pandemic held one year later in 2021), Rome (2022) or Belgrade (2024). In 2023 the European Championships were part of the third European Games that took place in Oswiecim, Poland (then only eight events were carried out). The edition in Madeira 2025 marked the first stand-alone European Artistic Swimming Championships, after the last – so called – “Euro Cup” in 2019.

Artistic swimmers, including 14 males, from 22 European Aquatics member federations will compete in Paris. Among them the Spaniards with their super star Iris Tio, who helped Spain win the team bronze medal at the Olympic Aquatics Centre at the Paris 2024 Games, and who returns with fond memories.

#### **Tio, Bleyer, Khandoshka and the Alexandri(s) – Illustrious field in the women’s events**

Iris Tio, the 23-year-old Catalan from Barcelona looks back on an outstanding year 2025. She won three gold, two silver and one bronze medal at the Europeans in Funchal, followed by three golds—including her first in the solo free- and three bronzes at the Worlds in Singapore. She is undoubtedly a top medal contender not only in the solo events but also in the duet (with Lilou Lluís) and mixed duet (with Dennis González).

The Alexandri triplets, who achieved such great success for Austria in recent years, have returned to their native Greece and received - shortly before the start of the European Championship - clearance to compete for Greece. The sisters will participate in Paris in the solo and duet events. Eirini and Anna-Maria Alexandri are the current European and World Champions in technical duet, Vasiliki won the Solo tech event last year in Funchal.

Team Germany is led by Klara Bleyer, who entered the solo free routine competition as the defending champion, having become the first ever German to win European Championship gold in the solo event in Funchal last year. Bleyer, who additionally won European bronze in the duet free 2025 with Amelie Blumenthal Haz, is once again among the top contenders for the title. She will compete in both solo disciplines as well as in both duet events alongside her new partner, Maria Denisov.

## **PREVIEW – ARTISTIC SWIMMING**

Also among the top favourites is Great Britain, who entered Kate Shortman and Isabelle Thorpe, 2024 Olympic silver medalists, for the duet event. Both made their competitive return earlier this year at the 2026 Paris World Cup. Isabelle Thorpe and her partner Ranjuo Tomblin are also among the front runners in the mixed competition.

Italy has successfully managed the generation transition; with Enrica Piccoli and Lucrezia Ruggiero they have strong contenders in the women's events, just as Filippo Pelati, who represents a top prospect in the men's events.

Another top contender for medals in the women's solo events is Vasilina Khandoshka (NAA), who recently shone by winning silver (solo tech) and bronze (solo free) at the 2025 World Championships in Singapore. Host nation France has entered four competitions and set their hopes especially on the duet with Laelys Alavez and Romane Lunel.

Thanks to the new events and the new scoring system, the landscape of Artistic Swimming has changed a lot in the past years. Altogether nine different nations in Belgrade and eight different ones in Funchal won at least one medal and it will be interesting to see who makes it to the top of the medal table this time.

The 2023 European edition in Poland included the mixed gender team competition for the first time, with German Frithjof Seidel becoming the first man ever in this discipline to win a medal, when Team Germany finished second in the Free Combination and won their first European synchro medal after 40 years.

The Mixed Duet which celebrated its première at the 2015 Worlds in Kazan and will be on the European programme for the 8<sup>th</sup> time, has become a highlight of the championships. In Paris, eight teams in the technical event and six teams in the free event will compete.

### **Gonzalez, Tomblin and Pelati provide strong competition in the Men's events**

Last year's European Champions Ranjuo Tomblin from Great Britain (solo tech) and Spaniard Jordi Caceres (solo free) as well as the two World Championship medallists Filippo Pelati from Italy (bronze solo free) and Dennis Gonzalez from Spain (silver solo tech) are aiming for the highest spot on the podium in the Men's solo events, where medals will be awarded for the 4<sup>th</sup> time since Rome 2022.

After Giorgio Minisini, the first ever European Champion and one of the defining personalities of this sport, has retired from artistic swimming, his successors are ready to scoop the medals. Altogether Athletes from seven nations have entered the men's events.

In Paris, a total of eleven titles will be at stake. Since 2016, three titles were added in the Technical Routines (Solo, Duet and Team), additionally, since the Europeans in London, the Mixed Duet has also become a constant feature of the programme. Budapest 2021 celebrated the debut of the Highlight competition, which since 2024 is run under the name "Acrobatic Routine". The Combination is like in 2024 not a part of this years' edition. Rome 2022 witnessed the première of the Men's solo events (Free and Routine).

Paris 2026 will therefore be a high-level test to see whether or not one is on the right track—and, for all the athletes, a milestone on the road to the 2028 Olympic Games in Los Angeles.

**The participating 22 Federations in Paris:** BEL – Belgium, BUL – Bulgaria, CZE – Czechia, ESP – Spain, FIN – Finland, FRA – France, GBR – Great Britain, GEO – Georgia, GER – Germany, GRE – Greece, ISR – Israel, ITA – Italy, MLT – Malta, NAA – Neutral Athletes A, NAB – Neutral Athletes B, NED – Netherlands, POR – Portugal, SUI – Switzerland, SVK – Slovakia, SWE – Sweden, TUR – Türkiye, UKR – Ukraine

## **EDUCATIONS FACTS: UNDERSTANDING ARTISTIC SWIMMING**

Artistic Swimming combines athleticism, choreography, strength and precision in routines performed to music. Athletes are judged not only on technical execution, but also on synchronization, creativity and artistic impression.

Competitions feature solo, duet, mixed duet and team events, with athletes performing highly complex movements both above and below the water surface.

### **KEY TERMS & VOCABULARY**

#### **Hybrid**

A hybrid is a sequence of leg movements performed underwater while the athlete is holding their breath (apnea). Hybrids are one of the core technical components of Artistic Swimming.

#### **Six types of hybrid difficulties:**

- **Spin** – rotations moving upward or downward
- **Twists** – rotations performed while maintaining the same height
- **Thrust** – explosive movements launching the athlete high above the water
- **Flexibility** – split or back flexibility positions
- **Airborne** – maintaining one or two legs above the surface
- **Connection** – linked movements between athletes

#### **Declared Difficulty (DD)**

Declared Difficulty represents the total planned difficulty of the routine or individual elements.

Coaches submit the intended difficulty on a **Coach Card (CC)** before the performance.

The higher the difficulty, the greater the scoring potential — but also the higher the risk of mistakes.

#### **Acrobatic Elements (Lifts)**

Acrobatic movements occur when teammates propel one or more athletes above the water. These are among the most spectacular moments in Artistic Swimming.

#### **Four families of acrobatics:**

- **Airborne** – athletes launched into the air performing rotations or flips
- **Balance** – athletes elevated while maintaining contact with the base
- **Platform** – athletes lifted from a platform created by teammates
- **Combined** – combinations of multiple acrobatic styles

#### **Technical Controllers (TC)**

Technical Controllers verify whether all declared elements were correctly performed according to the rules and difficulty chart.

They play a role similar to VAR officials in other sports, reviewing routines in real time and after performances if needed.

#### **Basemark**

A basemark is a major penalty that reduces the difficulty value of an element to 0.5 when it is not correctly executed.

Because difficulty heavily influences scoring, basemarks can significantly affect final rankings.

## **EDUCATIONS FACTS: UNDERSTANDING ARTISTIC SWIMMING**

### **HOW ARTISTIC SWIMMING IS JUDGED**

#### **Four Main Evaluation Areas**

##### **1. Difficulty Verification**

Technical Controllers confirm whether the declared difficulty was correctly achieved. Some reviews may happen after the performance using video replay.

##### **2. Synchronization**

Judges evaluate how precisely athletes move together.

Synchronization errors are categorized into:

- Small
- Obvious
- Major

Penalties accumulate throughout the routine.

##### **3. Execution**

Each hybrid, acrobatic movement and technical element receives an execution score based on quality and precision.

##### **4. Artistic Impression**

Judges assess:

- Choreography
- Musical interpretation
- Creativity
- Presentation
- Use of pool space

### **HOW SCORING WORKS**

#### **Routine Score**

The final score combines:

- Element scores
- Artistic impression
- Penalties deductions

Scoreboards often display:

- Declared difficulty (DD)
- Performed difficulty
- Synchronization penalties
- Artistic scores

### **EVENTS AT THE EUROPEAN CHAMPIONSHIPS**

#### **Solo Events**

- Technical Solo
- Free Solo

Performed by one athlete, either female or male, being two different events.

#### **Duet Events**

- Technical Duet
- Free Duet

Performed by two female athletes.

## **EDUCATIONS FACTS: UNDERSTANDING ARTISTIC SWIMMING**

### **Mixed Duet Events**

- Technical Mixed Duet
- Free Mixed Duet

Performed by one female and one male athlete.

### **Team Events**

- Technical Team
- Free Team
- Acrobatic Team

Performed by eight athletes, with up to two male athletes permitted.

## **TECHNICAL VS FREE ROUTINES**

### **Technical Routines**

Technical routines include mandatory required elements called **TREs (Technical Required Elements)**. All athletes must perform these specific movements.

These routines prioritize:

- Precision
- Technical quality
- Synchronization

### **Free Routines**

Free routines allow greater creativity and choreography freedom.

Athletes can maximize:

- Difficulty
- Artistic expression
- Acrobatic content

## **WHAT MAKES ARTISTIC SWIMMING EXCITING TO WATCH**

### **Athleticism Underwater**

Athletes perform long underwater sequences while holding their breath, often upside down and in perfect synchronization.

### **Acrobatics**

Lifts and throws create dramatic visual moments, especially in team and acrobatic events.

### **Music & Choreography**

Each routine tells a story through movement and musical interpretation, combining sport and performance art.

## **EDUCATIONS FACTS: UNDERSTANDING ARTISTIC SWIMMING**

### **KEY MOMENTS TO WATCH**

#### **Hybrids**

Complex underwater sequences often determine scoring potential and routine difficulty.

#### **Acrobatic Elements**

High-risk lifts can dramatically increase scores — or lead to costly penalties.

#### **Synchronization**

Tiny timing differences between athletes are visible to judges and can influence rankings.

#### **Final Pose & Finish**

Strong finishes often leave a major impression on both judges and spectators.

### **COMMON MISCONCEPTIONS**

#### **“It’s just dancing in water”**

Artistic Swimming is one of the most physically demanding aquatic sports, requiring:

- Strength
- Flexibility
- Lung capacity
- Precision
- Team coordination

Athletes may spend extended periods underwater while executing explosive movements and complex choreography simultaneously.

### **INTERESTING FACTS**

#### **Did You Know?**

- Athletes often perform while holding their breath for long underwater sequences.
- Difficulty values are pre-declared by coaches before routines.
- Video review systems are frequently used to confirm technical elements.
- Acrobatic Team events feature some of the most spectacular lifts in aquatic sports.
- Synchronization penalties can be decisive even in routines with very high difficulty.

## ALL-TIME European Medal Table Artistic Swimming

(all events 1974-2025)

|    | Nation     | Gold | Silver | Bronze | Total |
|----|------------|------|--------|--------|-------|

The background of the entire page is a dark blue color. It is decorated with a pattern of light blue wavy lines, resembling stylized water ripples. These lines are arranged in a grid-like fashion, with some lines being slightly offset or missing in certain areas, creating a dynamic and aquatic feel.

## **PREVIEW – OPEN WATER SWIMMING**

### **After 2024 Olympic Games: Open Water Swimming returns to Paris – 23 federations with numerous top stars to participate – Second edition of the 3km knockout sprints**

Paris (EA) – With quite a bunch of top swimmers dominating the open water scene in recent years, the 22<sup>nd</sup> edition of the European Aquatics Open Water Swimming Championships, to take place in Paris, promises no less than world class competitions. To date 89 athletes (46 female and 43 male) have confirmed their entries.

#### **Quartet with host France, Germany, Hungary and Italy to fight for the medals**

Altogether 23 European Aquatics member federations have entered the seven events and a glimpse at the entry list promises thrilling world-class competitions.

**Hungary** topped the medal table in 2025 with five gold, two silver and two bronze and made a big step in direction of the all-time Top 3. With their super stars, Paris Olympic champion Kristof Rasovszky and bronze medallist David Betlehem, who is also the freshly crowned World Cup overall winner, Hungary's open water aces might be the strongest opponents of the Italians and Germans. Viktoria Mihalyvari-Farkas, 2025 European Champion 10km and runner-up 5km, and Bettina Fabian, the European champion and World bronze medallist in the 3km-knockout event, set the "pace" in the women's competitions last year in Stari Grad and will surely figure again among the top favourites for a top spot on the podium.

**Germany** (22 gold so far) heads to the competition with the four-time World champion from Singapore 2025 – an athlete who still has a score to settle with the "waters of Paris." Florian Wellbrock had entered the 2024 Olympic race as one of the absolute top favorites but ultimately suffered a disastrous outing. In Paris, Wellbrock, who triumphed in all four events at the Worlds in Singapore, is slated to compete in all four races: the Olympic 10-kilometer event, the half-distance race, the knockout sprint, and the relay.

His teammate Oliver Klemet, however, had a stellar day on that August 09, 2024, and ended up taking home Olympic silver. Klemet's versatility is his great strength. While Wellbrock is focusing entirely on the open water events this August, Klemet, who suffered a broken arm last autumn, plans to compete in both – open water and pool – events, with the latter freestyle events (800 and 1500m) getting underway towards the end of the championships. Isabel Gose, Olympic pool bronze medalist on the 1500m freestyle, and the newly crowned European junior open water champion Julia Ackermann round up the German team. Lea Boy withdrew from the event at short notice. Due to health issues preventing her from training she already missed the German nationals.

**Italy** is not only the leading nation in the medal table (38 Gold), but always a medal contender at every single edition. A glimpse at the European medal tables since 2016 shows that Italians have always been in the Top 3. Without a shadow of a doubt, they once again count among the top favourites in Paris – in the women's as well as the men's competitions. With altogether 24 medals at the last three editions in 2022, 2024 and 2025 as well as a total of 99 medals since the inauguration of the championships in 1989, the Italian swimmers will surely travel back with medal number 100 – especially as they can count on their open water aces such as Giorgio Paltrinieri, Domenico Acerenza, Ginevra Taddeucci and Barbara Pozzobon.

## **PREVIEW – OPEN WATER SWIMMING**

Host **France** has entered their top stars Logan Fontaine, Marc-Antoine Olivier, Caroline Jouis and Ines Delacroix to further increase their medal tally (42) in “home waters”. **Spain** is likely to be a force to be reckoned with, particularly in the women's races, featuring competitors such as Angela Martinez, Candela Sanchez and Paula Otero.

### **3km knockout sprint for the 2nd time – Hungary defending champion in the team event**

The 3km knockout sprint was introduced to the European programme in 2025 and already part of last year's championships in Stari Grad as well as at the World Championships in Singapore. Knockout sprints are elimination races over a total of three kilometres. Athletes swim consecutive laps of 1500m, 1000m, and 500m. The slower competitors are eliminated in the first two heats and the best 10 contest the medals in the last 500m sprint.

The team event – introduced to the European programme in 2008 – always offers a great opportunity to show team spirit and there is not a shadow of a doubt that this event will be an exciting and emotional conclusion of the open water competitions on August 08.

Italy snatched European gold in the team event six times – the last two times in Budapest 2021 and on home soil in Rome 2022. Germany earned the World title in 2022 and 2025 but is still waiting for the first European gold. Hungary, who secured the crown in the team event for the very first time 2024 in Belgrade and successfully defended it in Stari Grad two years later, will be trying to keep the Italian and German competitors at bay to win the European title for the third time in a row.

**The following 23 EA member federations have entered for Paris:** AUT – Austria, BEL – Belgium, CZE – Czechia, ESP – Spain, EST – Estonia, FIN – Finland, FRA – France, GBR – Great Britain, GER – Germany, GRE – Greece, HUN – Hungary, ISR – Israel, ITA – Italy, MKD – North Macedonia, MON – Monaco, NAB – Neutral Athlete B, NED - Netherlands, POL – Poland, POR – Portugal, SLO – Slovenia, SUI – Switzerland, SVK – Slovakia, TUR – Türkiye.

## **EDUCATIONS FACTS: UNDERSTANDING ARTISTIC SWIMMING**

Open Water Swimming takes competitive swimming beyond the pool and into natural environments such as rivers, lakes and seas. At the European Aquatics Championships, races are contested in outdoor conditions, where endurance, tactics, navigation and adaptability are just as important as speed.

Unlike pool swimming, athletes must manage currents, waves, weather conditions and physical contact with competitors throughout the race.

### **THE DISCIPLINES**

#### **Individual Events**

Open Water Swimming races are mass-start endurance events held in natural bodies of water. The main individual events include:

- 5km
- 10km

The 10km is the Olympic-distance event and is often referred to as the “marathon swim”. Unlike pool swimming, races are heavily influenced by:

- Tactical positioning
- Navigation
- Drafting
- Environmental conditions

### **KNOCKOUT SPRINT**

#### **What is the Knockout Sprint?**

The Knockout Sprint is one of the newest and most dynamic Open Water Swimming formats. Athletes compete over short-distance (3km in total) elimination races across multiple rounds:

- Heats
- Semi-finals
- Final

Only the top finishers from each round qualify for the next stage.

#### **What makes it exciting?**

- Fast-paced racing
- Aggressive tactics
- Frequent changes of position
- Short recovery time between rounds

The format is designed to create constant action and spectator engagement.

## EDUCATIONS FACTS: UNDERSTANDING ARTISTIC SWIMMING

### RELAYS

#### Mixed Team Relay

Relay races feature teams of swimmers completing shorter sections of the course before exchanging with teammates.

#### Key points

- Mixed-gender format
- Fast exchanges are essential
- Strategy plays a major role in athlete order
- Relay events are usually among the loudest and most exciting races for spectators

Unlike individual races, relays are often very explosive from the start.

### KEY MOMENTS TO WATCH

#### The Start

The opening seconds are highly physical as swimmers fight for positioning and clean water. Strong starts are important to avoid getting trapped in the middle of the pack.

#### Turn Buoys

Buoy turns are often among the most exciting moments for spectators, especially when positioned close to the public viewing areas.

Athletes battle for the shortest racing line while trying to maintain momentum and avoid contact.

#### Feeding Procedures

During longer races, athletes may receive hydration and nutrition from coaches positioned on feeding pontoons.

This is a highly strategic moment:

- Timing is important
- Missing a feed can affect performance
- Athletes try to feed without losing contact with the lead group

#### The Final Lap

Commentators play an important role in building atmosphere during the closing stages of the race.

The final part of the competition often includes:

- Tactical attacks
- Positioning battles
- Sprint preparations
- Sudden accelerations toward the finish

## **EDUCATIONS FACTS: UNDERSTANDING ARTISTIC SWIMMING**

### **The Finish**

Open Water finishes are frequently dramatic, with athletes separated by tenths or hundredths of a second after racing for nearly two hours.

Photo-finish technology is used when necessary.

## **WETSUITS & WATER TEMPERATURE**

### **Wetsuit or Non-Wetsuit Races**

Whether wetsuits are permitted depends primarily on water temperature.

The water temperature limits are minimum 16 degrees and maximum 31 degrees.

The compulsory use for a wetsuit is from 16 to 18 degrees. Over 18, the wetsuit is not allowed.

### **Without wetsuit**

- Standard championship racing format
- Greater freedom of movement
- Faster swimming speed for elite athletes

### **With wetsuit**

- Added buoyancy and thermal protection
- Used when water temperatures are lower

Water temperature is carefully monitored before every race.

## **FLAGS & SAFETY PROCEDURES**

### **Yellow Flag**

The yellow flag is the first warning to the swimmer and must be given by a Referee along the race.

### **Red Flag**

The red flag is the final warning and means the disqualification of the swimmer.

The athlete has to leave the race.

## **EDUCATIONS FACTS: UNDERSTANDING ARTISTIC SWIMMING**

### **SAFETY IN OPEN WATER SWIMMING**

#### **Safety First**

Open Water Swimming has one of the most comprehensive safety systems in aquatic sports.

Safety teams include:

- Lifeguards
- Medical staff
- Rescue boats
- Kayaks
- Safety personnel

#### **The Safety Officer**

The Safety Officer oversees all athlete safety operations.

Responsibilities include:

- Monitoring weather and water conditions
- Coordinating rescue teams
- Ensuring emergency procedures are ready
- Advising whether races can safely proceed

#### **The Course Officer**

The Course Officer supervises the race course itself.

Responsibilities include:

- Buoy placement
- Course measurements
- Start and finish areas
- Feeding platforms
- Ensuring the course complies with regulations

### **COMMON TERMS & VOCABULARY**

#### **Drafting**

Swimming behind another athlete to reduce resistance and save energy.

#### **Sighting**

Lifting the head forward to navigate toward buoys.

#### **Clean Water**

Swimming space free from turbulence and contact.

#### **Feeding**

Receiving hydration or nutrition during the race.

#### **Pack Swimming**

Large groups of swimmers racing together strategically.

## **EDUCATIONS FACTS: UNDERSTANDING ARTISTIC SWIMMING**

### **WHAT MAKES OPEN WATER EXCITING TO WATCH**

#### **Unpredictable Racing**

Conditions can change throughout the race:

- Wind
- Waves
- Currents
- Temperature

Every competition develops differently.

#### **Tactical Racing**

Unlike pool swimming, Open Water races are often tactical until the closing stages.

Athletes must balance:

- Energy conservation
- Drafting
- Positioning
- Navigation
- Sprint timing

## **ENVIRONMENTAL SUSTAINABILITY**

### **Protecting Competition Venues**

European Aquatics is committed to preserving the natural beauty of competition venues.

To reduce environmental impact:

- The use of plastic cups and bottles during races is prohibited
- Sustainable hydration solutions are encouraged
- Waste reduction measures are implemented throughout the event

Protecting open water environments is a key priority for the sport.

## **INTERESTING FACTS**

### **Did You Know?**

- Open Water Swimming became an Olympic sport in 2008.
- Elite 10km races can last close to two hours.
- Athletes often finish within seconds of each other after racing long distances.
- Drafting can significantly reduce energy expenditure.
- Environmental conditions can completely change race tactics from one day to

## All-time Medal Table European Championships – Open Water

(all events 1989-2025)

|    | Nation    | Gold | Silver | Bronze | Total |
|----|-----------|------|--------|--------|-------|

| 16 | POR       | 0    | 1      | 1      | 2     |
| 17 | ISR       | 0    | 0      | 1      | 1     |
| 17 |           | 124  | 123    | 124    | 371   |

### Notes:

- 1997 two silver medals (but no bronze medal) were awarded to Stéphane Lecat (FRA) and Christof Wandratsch (GER) in the Men's 25km.
- 2006 two bronze medals were awarded to Jana Pechanova (CZE) and Larisa Ilchenko (RUS) in the Women's 5km.
- 2010 two bronze medals were awarded to Spyridon Giannotis (GRE) and Simone Ruffini (ITA) in the Men's 5km.
- 2016 two gold medals were awarded to Aurelie Muller (FRA) and Rachele Bruni (ITA) in the Women's 10km.
- 2022 the men's and women's 25km race was halted due to extreme weather conditions. An athlete ranking based on the positions at the time of the suspension was established later.
- 2025 premiere of the 3km Knockout Sprint Finals for Women and Men
